

HOFMANN® 

geoliner® 630

PRECISION WHEEL ALIGNMENT

ENGINEERING UNLEASHED™

REDUCE SETUP AND MEASUREMENT TIMES

Utilizing advanced imaging technology, the Hofmann® geoliner® 630 provides accurate, real-time measurements, reducing setup and measurement times while generating serious productivity benefits. Equipped with our latest software, the geoliner® 630 wheel aligner provides readings to technicians in a matter of minutes.

NOTIFICATION SYSTEM

Our smart notification system maximizes efficiency and accuracy by automatically identifying and fixing issues like suspension stress or environmental errors, and only requires technician intervention when more information is needed to take different corrective action.

COMPENSATE:

Measurement ok and compensated with no notification

WARN:

Wheel imperfections are compensated and user is warned

ALERT:

Critical errors are detected and corrective actions are displayed

XD CAMERA TECHNOLOGY

Cutting-edge high-definition video speed cameras continuously monitor the alignment process and instantly detect common environmental conditions or vehicle issues with the potential to cause misalignment.

REMOTE-CONTROLLED TILT BEAM

Enables technicians to conveniently tilt the beam swiftly and with ease using a simple-to-operate remote control.

QUICK COMPENSATION

AND OPTIMIZED ALIGNMENT FLOW

Boost productivity by eliminating unnecessary steps. The alignment process is greatly enhanced by our quick measurement compensation and optimized alignment flow, which enables shops to grow their alignment business through increased productivity.

VODI™

Using simple, easy-to-follow red and green LED lights, our patented Vehicle Orientation Directional Indicator (VODI™) leads technicians through the measuring procedure while the monitor is not in view, decreasing the time spent moving back and forth between vehicle and aligner.
