CAR WHEEL BALANCER

ENGINEERING UNLEASHED™

The geodyna® 3700 Wheel Balancer from Hofmann® combines technology with a compact design, delivering service. Built to meet the demands of today's vehicles, this balancer ensures accurate results with minimal effort, enhancing shop productivity.

The geodyna® 3700 offers an intuitive interface that simplifies operation for technicians of all skill levels. Semi-automatic parameter entry and easyALU™ mode streamline setup, while the Split Weight Mode allows for discreet weight placement behind spokes, preserving wheel aesthetics. Supporting static, dynamic, and motorcycle balancing modes, this balancer handles a wide range of wheel types with ease.

With integrated weight storage and a user-centric design, the geodyna® 3700 empowers shops to deliver accurate results and maximize profitability.

QUICKBAL™

Engineered for optimal performance, this feature intelligently adjusts the number of revolutions according to each wheel's specifications. Operating at maximum speed, it effectively reduces cycle time, delivering swift and efficient results.
